Green Banking

Capacity Building on Green Energy and Climate Finance

India, Indonesia, Philippines, Thailand and Vietnam

WHAT IS GREEN BANKING?

“Green Banking – Capacity Building on Green Energy and Climate Finance” is a three-year programme of the Renewables Academy (RENAC) in cooperation with the Association of Development Financing Institutions in Asia & Pacific (ADFIAP) for professionals from India, Indonesia, Philippines, Thailand and Vietnam.

The project is part of the German International Climate Initiative (IKI). The Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) supports the initiative following a decision of the German parliament (Bundestag).

OBJECTIVES

“Green Banking” aims at increasing the availability of financing instruments for renewable energy and energy efficiency projects in the partner countries.

The capacity building programme will facilitate the access to international climate finance options and will support financial institutions to benefit from new business opportunities in growing green markets.

WHO CAN APPLY?

The trainings aim at professionals from private and public institutions involved or interested in financing renewable energy and energy efficiency projects:

- Commercial banks
- Development banks
- Private equity, risk capital and infrastructure funds
- Institutional investors
- Project developers
- Ministries
- Public and private companies

WHAT IS INCLUDED IN THE TRAINING PROGRAMME?

- Scholarships for face-to-face trainings and delegation tours in the partner countries and in Germany, including materials, field trips, lunch, tea & coffee, travel & health insurance (if travelling to Germany).
- For trainings and delegation tours in Germany, Green Banking will cover 50% of travel costs (economy flight to/from Germany and up to 7 nights in a middle class hotel in Berlin). RENAC will assist participants in organizing accommodation and travel visas.
- Scholarships for internet-based trainings (access to material, help desk, forum, self-evaluation and certificate).

WHAT WILL PARTICIPANTS LEARN?

- Specific know-how in renewable energy (RE) and energy efficiency (EE) technologies
- Private sector finance instruments for climate change mitigation
- Appropriate risk evaluation and mitigation schemes.
- Knowledge about existing international climate change mitigation funds and the available access opportunities.
- Use of an advanced Excel tool for project assessment and financial structuring for RE and EE projects
