

1. Company/Institution Profile

Date	
Company/Institution name	
Address	
Country	
Registered tax number (for companies)	
Telephone & Email	
Please write the name and contact details of the main person to discuss the project with:	
Please write the name and title of the authorised signatory for the contract:	
Which sector describes your company/institution?	Private Sector, State Agency
, ,,	Research Organization, University
	If other, please specify:
Does your company/institution have prior experience in renewable energy or energy efficiency?	Yes, No
2. Your request/enquiry	
Are you making a public call/tender for the training course? If not, are you also requesting quotes from other training providers besides RENAC?	
If possible, please indicate who else you have approached and for what.	
What are the expectations of your company/institution, and what is the overall aim and objective of the training course?	

Please state your objectives in the following form using action verbs that are measurable, "After completion of this course, participants should be able to e.g., state, explain, apply, analyse, evaluate, create"	
What are the top three things the participants should be able to do at the end of the course?	
(e.g.: describe, implement, design, distinguish, identify, commission, prepare, interpret, recognize, calculate, build, connect)	
3. Training formats and duration	
months. Participants have the flexibility to le schedule. Our courses are accessed via our i material, videos, live lectures, self-tests, discontinuous material, videos material, videos, live lectures, self-tests, discontinuous material, videos, live lectures, liv	ning courses with durations of a few weeks, up to several earn at any time and from any location according to their own interactive learning platform and feature multimedia learning cussion forums, assignments and online exams. de hands-on-practicals, in-class teaching and field trips. They city from experts in the field. These in-person courses usually offer a unique learning experience with a mix of up-to-date all equipment, and excursions. Physical presence in Berlin or
elements of online and face-to-face cours instructors work with additional tools and	nnect people live all over the world - online . They combine es using new digital media. In these live virtual seminars, interactive teaching methods (e.g., brain storming sessions, a productive learning atmosphere that fosters a positive group a few days, up to two weeks.
online, followed by more in-depth courses into practice the essential subjects. The on months . Participants have the flexibility to s any location . Depending on the support recand self-evaluation tests. At the end of the	that take place live (in-person or virtually) to learn and put line program usually runs over a period of several weeks or tudy the online material at their own pace and time and from quested, the online phase can include live virtual classrooms, e online phase the participants are prepared for the second in live lectures in-person, with hands-on practical exercises,
Which training format do you prefer?	☐ Online (several weeks), ☐ In-person (2-10 days), ☐ Live virtual (2-10 days), ☐ Blended learning (Online and In-person),

Blended learning (Online and Live Virtual)

If other, please specify:

Where should the in-person course/ in- person phase of the blended learning course take place?	in RENAC (Berlin), In-person abroad
	If abroad, please let us know where:
When, ideally, should the course take place (please note RENAC usually needs 8-12 weeks preparation time)?	
How long do you expect the online phase to last (an online course as a preparation before the in-person course usually takes 3-6 weeks per course)?	
How long do you expect the live virtual/in-person course to last?	2 days, 5 days
	If other, please specify:
How many hours per day should the live virtual/in-person course run each day?	8 hours, 3-4 hours
	If other, please specify:
Should the course be repeated and/or developed as a longer-term capacity building exercise? Please explain.	
L	
Do you have an available budget for the course? Do you have to tender the project?.	
Please note that an average 5-day in- person course for up to 16 participants costs between 17,000-25,000 Euro. A 20-30-hour online course for up to 20	
participants costs 8,000-10,000 EUR.	

4. Language	
In what language should the courses be ideally given?	English, German, French, Spanish
, seem, g	If other, please specify:
Does the group of participants all speak the same language?	☐ Yes, ☐ No
Please indicate which one:	
If needed, would you be able to provide an interpreter for the course?	☐ Yes, ☐ No
If yes, please specify:	Simultaneous, Consecutive
5. Group structure	
How many participants need to be trained? We usually try to keep our course groups to around 16 participants (for in-person courses).	
Who are the target groups?	☐ Technicians, ☐ Engineers, ☐ Finance Institutions,☐ Public Authorities, ☐ Managers, ☐ Trainers-to-be,
	If other, please specify:
How homogeneous is the group of participants to be instructed (do they all	All Technicians, All Engineers, Mixed
have a similar background and knowledge)?— It might be necessary to	If others, please specify:
provide an online course in advance to bring the participants to a similar basic (technical) level before starting the inperson course.	
Are there differences in hierarchy between participants that need to be taken into consideration?	

6. Course content

6.1 Which renewable energy technologies/topics should the course cover?

	Introduction to the technology	In depth background to the technology	Legal aspects	Project management	Financial and economic aspects	Technical implementation	System design	Train the trainer	Business development	Operation and maintenance	Other *
Wind onshore											
Wind offshore											
Small wind onshore											
Photovoltaics (off-grid)											
Photovoltaics (on-grid)											
Solar hot water (residential systems)											
Solar hot water (large-scale systems)											
Biogas											
Biomass											
Biofuel											
Small hydro systems											
Grid integration											
Hybrid systems/ rural electrification											
Green hydrogen											

^{*}If other, please specify:

6.2 Which energ	y efficiency	technologies,	topics:	should the	e course cover?
-----------------	--------------	---------------	---------	------------	-----------------

	Auditing	Function of technologies, principles, technique, dimensioning system	Operation & Maintenance	Monitoring, data processing, software	Legal and political framework conditions	Costing and system economics	Financing schemes	Certification schemes	Energy management systems	Standards and norms
Energy efficiency in industry										
Energy efficiency in residential buildings										
Energy efficiency in commercial and public buildings										
Efficient energy supply										
Combined Heat and Power (CHP)										
6.3 Specifications for course content: What topics from your selection above should be the main focus of the course? Please prioritise! (in a 2-day course we cannot cover 10 topics – please also keep in mind your objectives from Section 1).										
,										
Is there any country-specific content you want us to cover?										
RENAC includes exercises and/or case studies where possible. Are there any particular practical training elements that you consider as important?										
How much of a focus/weighting should be given to the practical part? Please suggest a percentage.										

If you are requesting a train-the-trainer course, how much of an emphasis should be given to didactical /pedagogical methods and skills?	
% of total time:	
Please indicate any other specific requirements (software, etc.):	
Do you have specific contents that need to be integrated into the course?	
Should participants get a 'certificate of attendance' or should they pass a test to get a certificate?	Certificate of Attendance, Pass a test to get a certificate If other, please specify:
	,
RENAC materials are presented in the RENAC corporate design. If the presentation and documents need to be in a different style, please indicate so.	
7. Organisation (applicable for in-pers	on courses done abroad)
Who will organize the event locally?	
Do you have training rooms/facilities to fit the number of participants?	
Do you have someone to organize the lunch and coffee breaks at the site?	

Who will organize the transport of participants?	
Is the location of the course accessible via public transport or taxi?	Yes, No
Does RENAC need to provide service for disabled persons (e.g., wheelchair access)?	
Are there any precautions RENAC must take? (for example: extra safety when traveling, vaccination, kidnapping, visa requirements, etc.)	
8. Equipment (applicable for in-persor	n courses done abroad)
Can you provide IT, communication and moderation equipment required at the training location?	Yes, No
If yes, which of the following equipment can you provide? Necessary equipment: Laptops for participants, projector and screen, flip charts, audio equipment (mike, speakers)	
Where absolutely necessary (we prefer to avoid it because of the high costs of transport) RENAC can transport its mobile training equipment. If needed, please indicate which technology components should be sent:	Photovoltaics, Wind, Solar thermal
Do you want RENAC to help you equip a training center with renewable energy training equipment?	Yes, No

9. Additional Questions (optional)

RENAC is an ISO 9001 certified company. In order to ensure that our training course are to the highest standards we would like to ask you some questions about quality and certification schemes relevant to you:

Is your company/organisation certified? If yes by which scheme?	
Which national or international certification schemes do you know of that are relevant to the field of renewable energy?	

If you have any questions or need some further inform, please feel free to get in touch with me.

Thank you,

Manolita Wiehl, Director of International Business Development & Sales

Renewables Academy (RENAC) AG Schönhauser Allee 10-11, 10119 Berlin
